

IMMUNIZATION REQUIREMENT

Immunization Compliance

All students must be in compliance with New York State law regarding immunizations to be able to register for classes. The health center provides measles, mumps, and rubella immunizations at no charge for students who need vaccinations. New York State Public Law and Buffalo State University also require all students enrolled to complete and return the Meningitis Information Response Form. The meningitis form and the New Student Health Form are available online (<https://weigel.buffalostate.edu/forms/>) and are to be returned to the health center. If vaccines are provided in NYS, Weigel should be able to retrieve them on the state's immunization systems. Students should call (716) 878-6711 to verify that Weigel can obtain their vaccine records.
